At the 2014 Investor Day, the Company targeted achieving \$2.0 billion of Adjusted EBITDA by 2016, and not only **FAILED** to achieve its initial target, but Adjusted EBITDA actually declined in each year following 2014, meaning the Company made no progress towards its goal.

Actual Results For Core Business Below Expectations

“...we benefited this past quarter from a continued spike in our component MDI. Peter Huntsman, Chairman, President & CEO
February 2018

Huntsman also failed to achieve its 2016 Investor Day Adjusted EBITDA target.

See Section 4 for additional detail. Source: Public company filings, transcripts, and presentations. (1) Huntsman sold its European differentiated surfactants business to Innospec on December 30, 2016. The business contributed \$28 million of EBITDA in 2016 per the Company's Q4 2017 8-K filing, which is calculated as the difference between Adjusted EBITDA and pro forma Adjusted EBITDA as disclosed on page 6 of the filing. As a result, because the Company's \$1,300 million Adjusted EBITDA target had been set before the divestiture of the European differentiated surfactants business, we reduce the target by \$28 million. (2) Pro forma for spin-off of Pigments business and sale of European differentiated surfactants business.
