

We Are Extremely Concerned That Management's Bonus Targets Were Set Lower Than the Company's External Promises

The Board has consistently set Adjusted EBITDA targets, management's primary annual cash bonus metric, well below targets that the Company had communicated to shareholders at its various investor days.

Investor Day Adjusted EBITDA Target versus Annual Cash Bonus Target

(\$ in millions)

Compensation goals DECLINING and BELOW Investor Day Target

Compensation goals DECLINING and BELOW Investor Day Target

Compensation goal BELOW Investor Day Target

The Board has failed to hold management accountable for the Company's promises to shareholders.

See Section 6 for additional detail. Source: Public company filings. (1) Huntsman sold its European differentiated surfactants business to Innospec on December 30, 2016. The business contributed \$28 million of EBITDA in 2016 per the Company's Q4 2017 8-K filing, which is calculated as the difference between Adjusted EBITDA and pro forma Adjusted EBITDA as disclosed on page 6 of the filing. As a result, because the Company \$1,300 million Adjusted EBITDA target had been set before the divestiture of the European differentiated surfactants business, we reduce the target by \$28 million. (2) Shows 2017 "Normalized" TiO2 Adjusted EBITDA target per the 2016 Investor Day. (3) 2020 target calculated by taking 2017 Adjusted EBITDA pro forma for the sale of Chemical Intermediates (i.e. \$1,040 million) then adjusting for the impact of one-time events as disclosed on pg. 18 of the Company's 2018 Investor Day presentation, which results in pro forma 2017 Adjusted EBITDA of \$965 million. We then apply a 10% growth rate over three years, consistent with management targets in the Company's 2018 Investor Day presentation.

The Huntsman Board Was the Only One Among Proxy Peers That Reduced Annual Cash Bonus Targets in 2020

Not only did the Board choose to reduce management's Adjusted EBITDA target by 41%, but Huntsman was the only company among Proxy Peers to make such a reduction.

In contrast to its Proxy Peers, Huntsman not only revised full year 2020 short-term compensation targets, but did so after more than half the year had been completed.

See Section 6 for additional detail. Source: Public company filings. (1) Included a material COVID-related adjustment to EPS actuals when determining performance against compensation operating targets in FY20 (fiscal year ended 9/30). (2) Targets were not revised, but payout percentage was increased after considering strategic priorities and objectives in light of the pandemic. (3) Disclosed that in February 2020, the Board intended to revise targets following the close of its ChampionX acquisition. ChampionX closed in June 2020, at which point targets were reset to account for the inclusion of ChampionX in the Company's results. (4) Targets approved in April 2020. (5) Fiscal year ended May 30, 2021.

If Not for the Board's 2020 Mid-Year Target Revision, Management Would Not Have Received an Annual Cash Bonus

Had the Board not meaningfully lowered management's annual cash bonus targets in 2020, management would have likely not been eligible for annual cash bonus awards.

Board's Annual Cash Bonus Compensation Philosophy (2021 Proxy Statement)

The revised performance goals were set at aggressive levels that reflected our realistic expectations at the height of the COVID-19 pandemic. Achievement levels between threshold and target result in payouts from 0% to 100% of target awards. Achievement levels between target and maximum result in payouts from 100% to 200% of target awards. If we achieve corporate adjusted EBITDA of less than 85% of target, the payout for all other components may be capped at target. If corporate adjusted EBITDA is less than 75% of target, the threshold goal, then payment of any other component of the award would be at the discretion of our CEO and the Compensation Committee. The Compensation Committee believes that requiring a minimum adjusted EBITDA threshold be met to receive any payment with respect to the annual cash performance awards both aligns executives' interests with those of stockholders and prevents excessive annual cash performance award payments in times when our financial performance fails to meet our expectations.

The Board clearly states that management is not entitled to any annual cash bonus if Adjusted EBITDA is below 75% of target (i.e. threshold)

Adjusted EBITDA – Actual vs. Annual Cash Bonus Target

The Board's reduced targets allowed management to collect annual cash bonuses despite the Company's continued poor performance.

We Believe Years of Missed Promises Were Enabled By An Interconnected Board that Failed to Provide Accountability

Prior to Starboard's engagement with the Company, the Board consistently overlooked multiple significant director interlocks and personal relationships that we believe resulted in a lack of true independence.

A Board riddled with conflicts failed to hold management accountable for years of missed promises.
