In 2018, the Company committed to monetizing its 53% stake in Venator for AT LEAST \$1.0 billion...

"So again, I know that some are very anxious that we hold those shares. Others, very anxious that we sell those shares or swap those shares and so forth. We've got a very close handle on that, and it is our objective to be able to monetize those shares this year and. And to bring in another, at least, \$1 billion into the company and into the cash flow of the company."
