

Wall Street Analysts Also Do Not Seem to Believe That Huntsman Will Deliver on Its Latest Investor Day Targets

We believe Wall Street consensus estimates suggest a high degree of skepticism regarding the Company's 2021 Investor Day targets as estimated Adjusted EBITDA margins continue to be below the low-end of the Company's targeted range.

"For some cynics in Chemicals who have more grey hairs than ourselves, they've sat through previous HUN investor days that also felt compelling but ultimately didn't translate into results. There are a number of (fair) reasons for management to believe that "now is different" (upgraded portfolio, much cleaner balance sheet), but that is the historical challenge the stock is facing: Convincing the incremental buyer that this time is different. We think the setup into 2022-23 could be interesting if we get a few more good results on the board, but execution will be the ultimate determinant."

Huntsman 2021 Investor Day Adjusted EBITDA Margin Target versus Consensus Estimates⁽¹⁾

Wall Street consensus estimates for Adjusted EBITDA margins are BELOW the Company's targeted range

There seems to be significant skepticism among Wall Street analysts that Huntsman will achieve its targets.

Why Should Shareholders Believe the Company's Promises Will Finally Be Fulfilled?

The Company has already fooled shareholders three times since 2014 – why will this time be different?

Investor Day	Commitment	Achieved?	
2014 Investor Day	Achieve \$2.0 billion of Adjusted EBITDA over the next 2 – 3 years	×	Fooled Shareholders <u>ONCE</u> ...
2016 Investor Day	Achieve \$1.3 billion of Adjusted EBITDA in the core business by 2017	×	Fooled Shareholders <u>TWICE</u> ...
2018 Investor Day	Achieve 10% Adjusted EBITDA CAGR through 2020 and improve share price to ~\$60 per share by 2020 ⁽¹⁾	×	Fooled Shareholders <u>THREE TIMES</u> ...

The definition of insanity is doing the same thing over and over again and expecting different results!

Without change and significantly greater oversight, shareholders will end up incredibly disappointed again.

5. Poor Governance Practices

The Board Has Numerous Pervasive and Troubling Interconnects That Have Been Consistently Overlooked By ALL Members of the Board

We believe both the Board and the Nominating and Corporate Governance Committee (“Nom & Gov” or the “Governance Committee”) have proved unwilling or incapable of addressing seemingly obvious interconnects.

Nominating and Corporate Governance Committee

Dr. Beckerle

Other Board Members

Mr. Reaud
(2005 – 2022)

Mr. Ferrari
Since 2018

Ms. Dulá
Since 2020

Ms. Tighe
Since 2019

Ms. McGovern
Since 2021

 **Nominees Starboard Is Seeking to Replace at the Company's 2022 Annual Meeting**

Governance Failures

Complicit in apparent and problematic interlocks

Repeatedly failed to refresh long-tenured and interconnected directors

Repeatedly waived the Board's mandatory retirement policy for interconnected directors

Added directors lacking board experience and chemicals expertise to a Board that already lacked industry experience

Committee is not composed of truly independent members and has approved sham independence

Over the years, the Board has consistently failed to address numerous potential conflicts of interest.
