

If Not for the Board's 2020 Mid-Year Target Revision, Management Would Not Have Received an Annual Cash Bonus

Had the Board not meaningfully lowered management's annual cash bonus targets, management would have likely not been eligible for an annual cash bonus award in 2020.

Board's Annual Cash Bonus Compensation Philosophy (2021 Proxy Statement)

The revised performance goals were set at aggressive levels that reflected our realistic expectations at the height of the COVID-19 pandemic. Achievement levels between threshold and target result in payouts from 0% to 100% of target awards. Achievement levels between target and maximum result in payouts from 100% to 200% of target awards. If we achieve corporate adjusted EBITDA of less than 85% of target, the payout for all other components may be capped at target. If corporate adjusted EBITDA is less than 75% of target, the threshold goal, then payment of any other component of the award would be at the discretion of our CEO and the Compensation Committee. The Compensation Committee believes that requiring a minimum adjusted EBITDA threshold be met to receive any payment with respect to the annual cash performance awards both aligns executives' interests with those of stockholders and prevents excessive annual cash performance award payments in times when our financial performance fails to meet our expectations.

The Board clearly states that management is not entitled to any annual cash bonus if Adjusted EBITDA is below 75% of target (i.e. threshold)

2020 Adjusted EBITDA – Actual vs. Annual Cash Bonus Target

The Board's reduced targets allowed management to collect annual cash bonuses.

We Are Also Concerned With Huntsman's Lopsided Annual Cash Bonus Payout Structure

We believe the Board-approved annual bonus structure generously rewards management for small outperformance on targets while scarcely reducing bonuses for the same level of underperformance. We believe this lopsided incentive construct fails to properly hold management accountable.

Huntsman Annual Cash Bonus Multiplier vs. % Achievement of Adjusted EBITDA Target

A 4.5% miss on Adjusted EBITDA results in an 18% decrease in bonus, but a 4.5% beat results in a 100% increase in bonus!

The annual cash bonus payout structure disproportionately rewards minor outperformance while barely punishing underperformance, further reducing alignment with shareholders.

Huntsman's Annual Cash Bonus Structure is More Skewed Than Proxy Peers, Favoring High Payouts

Relative to Proxy Peers, Huntsman has the most lopsided payout structure, allowing management to easily earn rewards for minor outperformance while facing less severe penalties for similar underperformance.

Measure of Annual Cash Bonus Payouts Skewness⁽⁴⁾

Huntsman has the most skewed payout structure, meaning management gets rewarded significantly more for outperformance than they are penalized for the same underperformance.

The Board Has Approved Two Significantly Different Peer Sets to Benchmark Management Compensation

The Board has approved two materially different peer sets to benchmark compensation. The inconsistency between these two peer sets raises questions as to how the Board selects peers and whether they are appropriate.

Why does the Board use two vastly different peer sets to benchmark Total Shareholder Returns (“TSR”) and compensation?

Notably, Performance Peers Used For Long-Term Compensation Have Performed 2X Worse than Proxy Peers

Management's long-term incentive bonuses are determined by Huntsman's performance relative to Performance Peers. However, Performance Peers have meaningfully lower historical TSR than the Proxy Peers used to benchmark the CEO's base salary.

TSR Comparison (3 Years Prior to Starboard's Involvement)⁽¹⁾⁽²⁾

The Board appears to have set a low bar to determine if management is eligible for long-term equity bonuses.

The Board Frequently Changes Performance Peers, Raising Additional Questions Surrounding Its Methodology

Huntsman regularly changes the companies used to benchmark TSR for determining long-term compensation. We are concerned by these frequent and seemingly arbitrary changes.

Why does the list of Performance Peers fluctuate meaningfully from year to year?

The Board Provides Management With Incredibly Generous Perquisites

In addition to receiving outsized annual cash compensation and pension benefits, management also receives other forms of income and perquisites that we believe are atypical for its Proxy Peer group. For example, the CEO has uncapped use of the Company aircraft for personal travel, logging an annual average of 45 hours of personal travel time over the past three years.⁽³⁾

2020 CEO All Other Compensation

Huntsman management receives other valuable perks, such as personal use of the Company's private aircraft.

We Are Concerned With Management's Frequent Personal Use of the Company's Private Jet

In 2020 and 2021, management used the Company's private jet for a reported 202 personal hours. A closer look at flight logs reveals seemingly repeated personal trips to Miami, San Diego, Vail, and Nantucket.

Select Routes: Huntsman Private Jet (2020 to 2021)

We question management's personal use of the Company private aircraft.
